

**TRAINING MANAGEMENT  
(KC-135)**

---

**1. Objective.** As prescribed in AFI 38-201, *Determining Manpower Requirements*, formerly designated as AFR 8-10, this Air National Guard Manpower Standard (ANGMS) quantifies the full-time manpower required to accomplish the tasks described in the work center description for varying levels of workload volume.

**2. Authority.** Air National Guard (ANG) Regulation 66-14, *Maintenance Management*, 13 July 1988, contains policy and procedural guidance for the Training Management work center. This ANGMS was developed in accordance with the functional review procedures depicted in AFPAM 38-208V1, *Air Force Management Engineering Program (MEP) Processes*, formerly AFR 25-5.

**3. Applicability.** This standard applies to all ANG KC-135 units with an established Training Management function. This standard applies to peacetime operations only.

**4. Standard Data:**

- a. Classification. Type III.
- b. Approval Date. 25 November 1992.
- c. Man-Hour Data Source. Operational Audit (historical records and technical estimate techniques).
- d. Standard Man-Hour Equation.  $Y = 1.889 + 0.3475X$ .
- e. Workload Factor:
  - (1) Title. A Drill Status Guardsman Authorized.
  - (2) Definition. The average monthly number of drill status guardsmen authorized in FACs 2XXXXC excluding FAC 21030C.
  - (3) Source. Unit's most current extended unit manpower document.

**5. Application Instructions:**

- a. The valid man-hour range for this ANGMS is 80.77 through 140.41.
- b. The application instructions are as follows:
  - (1) Obtain the most current workload factor value for the workload factor as outlined in paragraph 4e above.
  - (2) Substitute this value in the man-hour equation for X and divide the resulting man-hours by the current civilian Man-Hour Availability Factor to determine requirements.
  - (3) Use the man-hour break point table developed by HQ USAF/PRQE to determine the whole manpower requirements.
  - (4) On AF Form 1113, Manpower Requirement column, find the column which represents the number of whole manpower requirements. Read up and down the column and across to the Air Force Specialty Title column to determine requirements by Air Force Specialty Code.

**6. Statement of Conditions:**

- a. There were no general conditions (environment, equipment, or facility) which had an impact on the development or application of this manpower standard.
- b. There were no approved enhancements that impacted the man-hour equation for this manpower standard.
